### **DETAILED ACTION**

1. This action is in response to applicant's remarks received on 02/08/06.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 19-21, 28, 32 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Lahr et al. (4,043,101).

Lahr et al. discloses the invention including a cutting head housing 18, a cutter means/rotatable cutter line 34, an elongate shaft 12, connection means (40, 54 and 56), a hand-grippable portion 14, an effective rotation (see Fig. 5) and an axis of rotation 36. The hand-grippable portion is located at an end of the shaft (see Fig. 1).

#### ***Allowable Subject Matter***

5. Claims 26-27 are allowed.

Art Unit: 3724

6. Claims 22-25 and 29-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is an examiner's statement of reasons for allowance: The claims 26-27 are allowable because the prior art fails to teach a motor enclosed within the ball 3b of the ball and socket joint connection as set forth in claim 26.

#### ***Response to Arguments***

8. Applicant's arguments regarding the location of the handle portion at a distal end of the shaft furthest from the cutting head, with respect to the rejection(s) of claim(s) 1-3, 19-21, 28, 32 and 33 under Fahrer in view of Everts have been fully considered and are persuasive, because Everts show only the engine located at a distal end of the shaft, rather than the handle. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Lahr et al.

#### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mattson et al. is cited to show related device.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3724

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
